MEAD is based on studying the concept of civilization multi-dimensionally through starting from our near geography to every part of global perspective and evaluating the outcomes to help our people and mankind. In addition to preserving and developing the cultural heritage, doing studies on security, economical, social, legal, psychological and cultural issues in order to dominate the concept of ‘legal state’, democracy, human rights, the culture of ‘pluralism, solidarity and democracy’ brought forth by the civilization values in social life are among the objectives of MEAD. On the basis of "Power and Justice", any step aiming to move above the modern civilization level is in the interest of MEAD.
